Introduction

Welcome to your Natal Chart report.

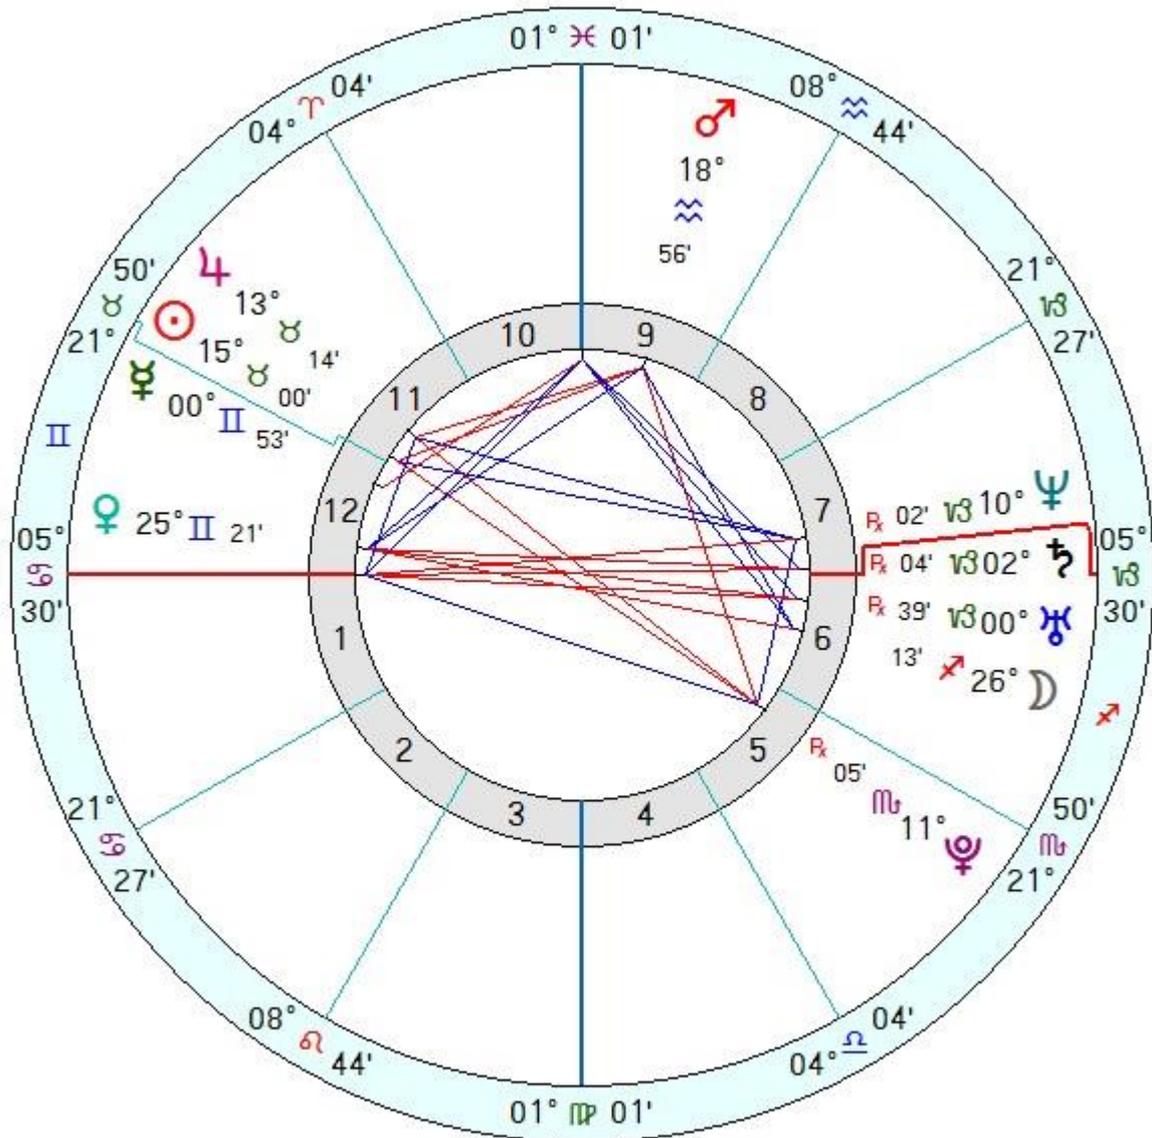

Your Natal Chart report is an astrological chart based on the mathematically precise positions of the planets and the Sun & Moon at the time, date and place of your birth. It provides you with insights into your character and personal life potentials by indicating the strengths you have and the challenges you experience in life.

Your Natal Chart report covers among other things your primary motivation in life, your identity, emotions, mentality, love and sexuality, spirituality, earning ability and career potentialities and so on.

In some parts of the report you will come across apparent contradictions in the descriptions of your character. This is to be expected; people are complex and have many contradictory facets to their personality.

Whilst reading this report, you may come across traits that have not appeared in your life. Not everything in a natal chart is expressed, and even if a trait does emerge, it can take many years before it becomes apparent.

We trust you will find the report insightful and helpful.

The 1st House cusp is, in most cases, the Ascendant or Rising Sign of your chart. It indicates your primary motivation in life and describes you, your self-expression and vitality. It is your physical appearance and the way others see you and interact with you. The house placement of your 1st House ruler shows the areas of life that are of primary importance to you. Also, planets in your 1st House influence how you present yourself to the world.

You may go through the process of inner transformation and regeneration at different junctures in your life, by taking on new identities after old ones have served their purpose.

Pluto Square Mars (7°51' S)

Quite simply, this aspect gives you the power to express your energies in either a positive and constructive manner or in a wilful and ruthless fashion. Positively, you have extraordinary staying power, which enables you to work long and demanding hours and to push yourself to the limit when required. Negatively, a desire to dominate or manipulate

people can backfire on you and cause confrontations and power struggles. Injuries are possible in high-risk situations or environments.

Pluto Opposition Jupiter (2°09' S)

You have a strong desire to make your mark on the world and to accomplish something of significance. Your ambition and self-motivation is pronounced and you will pursue your goals in life with passion and intensity. If other factors in your chart support it, this aspect can bring you power and leadership over others.

At the very least, you will be known in your own group or community for organising others and taking charge of situations. However, watch that you don't let power go to your head, because you will turn people against you, especially if they think they're being manipulated. Similarly, you can risk placing yourself in loss situations through arrogance, or if you provoke those with greater authority than yourself.

Pluto Sextile Neptune (1°02' A)

Neptune and Pluto are the solar system's slowest moving planets; consequently, aspects between them last for a great number of years and their effects are more collective than personal. Since 1940 and continuing until about 2040 they are in sextile aspect to each other.

The major effect of this is to accentuate spiritual awareness and development en masse. You are part of a generation that is intent on exploring and refining the inner aspect of life and consciousness itself. You will be aware of a universal interest in metaphysical subjects, clairvoyance and psychical research.

Problems at work may arise through over-sensitivity to others. You can form an emotional connection with pets or small animals.

You tend to be emotionally self-contained and inclined to keep an emotional distance between yourself and others. You do not find it easy to express your feelings to others; even those who have your trust. At times, you feel overwhelmed and exhausted by family responsibilities and it is possible that your relationship with a parent is distant or emotionally unfulfilling. There may be difficulties with the female-sex. You are also given to recycling feelings of anxiety and worry.

You rebel against commitment and emotional pressure from others or being made to feel obligated to meet their romantic expectations. Instead, you thrive on change and variety in love and the thrill of the new.

Adventurous and receptive to different experiences, you are fun to be with and open to experimentation. Emotionally, there can be a proneness to anxiety, stress and unpredictability. Artistically, you appreciate anything that is modern, original and unique.

Uranus Conjunct Saturn (1°25' A)

This aspect happens only once every 46 years due to the slow orbital speeds of these two planets. Socially, it represents periods of disruption in the world and the sudden tearing down of established structures: consider, for example, the resulting breakup of the Soviet Union following the most recent conjunction of Saturn and Uranus in 1988.

On a personal level, you often feel tense and churned up inside, as you struggle between the urge to conform and the urge to assert your individuality. One side of you wants to be like everyone else while the other side fights against it. For your own peace of mind, you need to find a balance between these conflicting urges.

You are quite rebellious and can buck against anyone or anything that restricts your freedom. Also, when you feel the pressure for change building up within you, don't suppress it as you may cause yourself stress, nervous tension and possible physical injury.

Uranus Sextile Midheaven (0°21' S)

While you generally get along well with others, you cherish your independence and the freedom to come and go as you please. Professionally, you will choose a career that is innovative and unusual in some way, or you could be attracted to modern occupations involving the latest technological advancements.

Saturn in 6th House

You take your health and well-being seriously. There can be periodic bouts of illness, with possible causes arising from stress, exposure to cold and damp or poor dietary habits. If you run your own business, there may be problems with staff including unreliability and theft.

Saturn Opposition Venus (6°44' A)

Regarding matters of the heart, you are cautious and inclined to put practical considerations before romantic desires. You have a tendency, to exercise self-control in love, perhaps at the expense of emotional satisfaction and spontaneity. People generally need to earn your trust before you allow them to get too close.

Yet, once trust is established, you are very loyal and steadfast. You view relationships seriously and value stability and fidelity in love. You are attracted to people older than yourself and respect their life experience and maturity. At times, you enjoy time alone and are content in your own company.

On occasion, you can be emotionally cool and indifferent. There may be difficulties in expressing affection and discomfort with intimacy. You can be inhibited and lack self-confidence in love, resulting in periods of loneliness. Estrangements and separations in love are possible.

The Qualities and Elements

The signs of the zodiac are grouped into two basic categories. These are known as the Qualities and the Elements. The Qualities describe fundamental modes of activity and the Elements describe temperament. There are three Qualities: Cardinal, Fixed & Mutable and four Elements: Fire, Air, Earth & Water. Your horoscope has varying degrees of each

Quality and Element. The percentages you have of each will determine their importance in your life. The higher percentages will be more powerful in your life, the lower percentages will be less powerful.

The Qualities

They are sensitive to the opinions of others, but they can also be impressionable and easily influenced by environmental circumstances. Mutable people lack the stubbornness of the Fixed signs and the forcefulness of the Cardinal signs, which makes them good mediators and gobetweens.
